# Fabriqué en Italie

## Made in Italy

À quand remonte votre dernier achat de poignée? Quand achèterez-vous la prochaine? L'industrie est basée sur un modèle de consommation lente. La mission de Manital est donc de créer des poignées qui survivront aux générations grâce à un design intemporel et des matériaux de haute qualité.

De la conceptualisation à la production, Manital travaille à minimiser l'empreinte environnementale de ses produits. «Fabriqué en Italie» n'est pas uniquement un synonyme de qualité, c'est aussi un choix écologiquement durable avec une production locale.

When was the last time you bought a handle? When will you buy the next one? The industry has slow consumption patterns so Manital's mission is to make handles that survive generations through timeless design and high quality materials.

From conceptualization to production, Manital work to minimize the environmental impact of their products. "Made in Italy" is not only a synonym for quality but also an environmentally sustainable choice with local production.

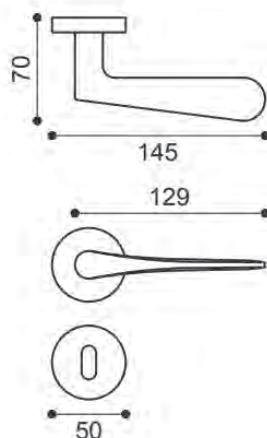

# Ala

**Une forme douce et délicate qui prend l'utilisateur «par la main». Ala s'inspire d'une libellule qui déploie ses ailes avant de prendre son envol.**

A delicate and soft shape that takes the user "by the hand". Ala is inspired by a dragonfly that frees itself in the air and takes flight.

# Ala

# Ala minimal

# Ala | American Lever

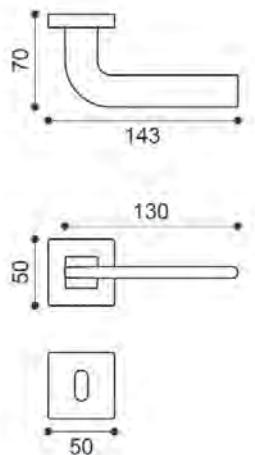

# Bimyou

**Bimyou se distingue par ses courbes délicates pour nous offrir un design équilibré et discret.**

Bimyou is distinguished by its delicately curved and edgeless shape to offer a balanced and discreet design.

# Flash

**Flash est une poignée au design élégant et minimaliste. La finesse et l'inclinaison de son évidement délicat ajoute un charme à travers un jeu d'ombre et de lumière.**

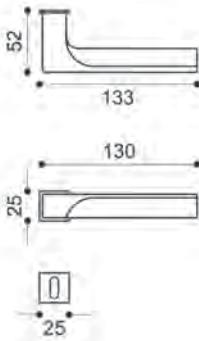

With an elegant and minimal design, Flash provides for a slender and inclined grip. The front features a delicate recess that adds charm through a refined play of light and shadow.

# Hygge

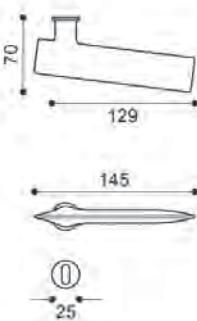

Hygge Due est une poignée au design linéaire et minimaliste. Son nom s'inspire du mot danois «Hygge», qui se définit par le lifestyle et la poursuite du bonheur de son peuple.

Hygge is a handle with a minimal and linear design. It gets its name from the Danish word Hygge, which refers to the lifestyle of their people focused on the pursuit of daily happiness.

# Polare

D'une conception simple et élégante, Polare combine parfaitement la forme carrée de la rosette et le volume cylindrique de la poignée.

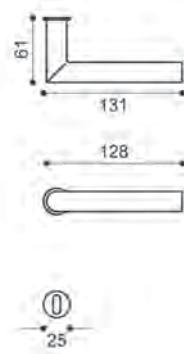

By its simple and elegant design, Polare combine the square shape of its rose with the cylindrical volume of the handle.

# Polare Minimal

# Polare | American Lever

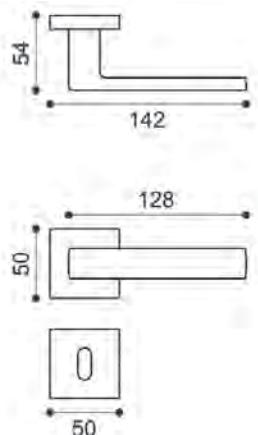

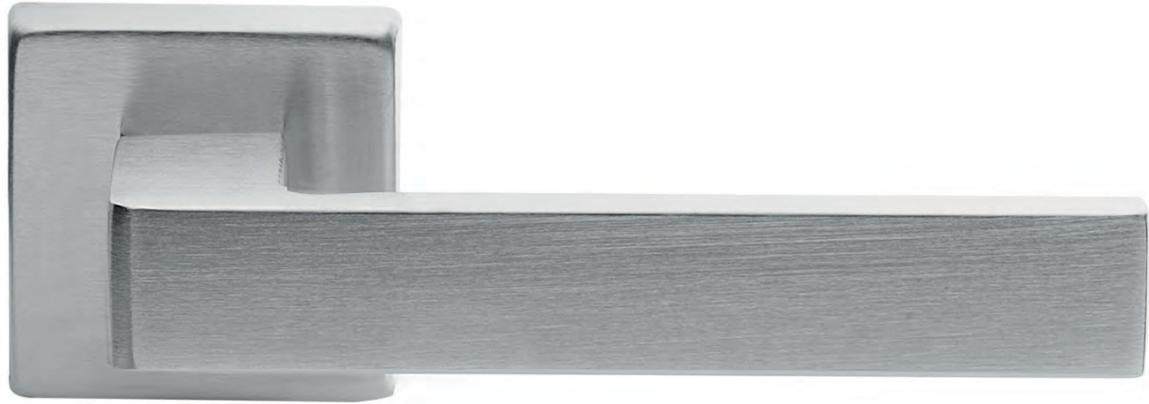

# Techna

Le design minimal de Techna se caractérise par des formes géométriques simples. La proportion des volumes nous offre une prise en main solide et stable.

Techna's minimal design reflects simple and regular geometric lines with proportions that offer a solid and stable grip.

# Vortex

**Vortex expérimente les formes générées par des courbes tridimensionnelles se poursuivant, offrant une géométrie sans début ou fin, presque comme si c'était infini.**

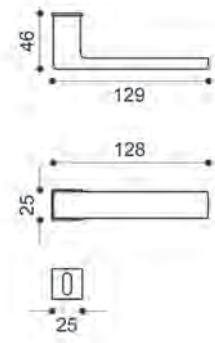

Vortex experiments with forms generated by three-dimensional curves chasing each other, a geometry without beginning or end, almost as if it were infinite.

# Écussons

## Escutcheons

ART. BES

ART. QES

L'écusson est l'élément architectural qui entoure le trou ou le cylindre de la serrure. Il aide à protéger le cylindre contre les bris et à protéger la zone environnante contre les dommages et l'usure qui pourraient être causés par la clé. Les écussons sont disponibles dans une gamme de formes et de finis pour correspondre au modèle de poignée sélectionné.

An escutcheon is an architectural item that surrounds a key hole or lock cylinder. It helps to protect a lock cylinder from being snapped, and to protect the surrounding area from damage and wear from the key when it misses the keyhole. Escutcheons come in a range of shapes and finishes to match the selected handle model.

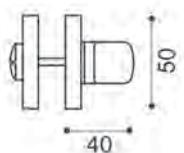

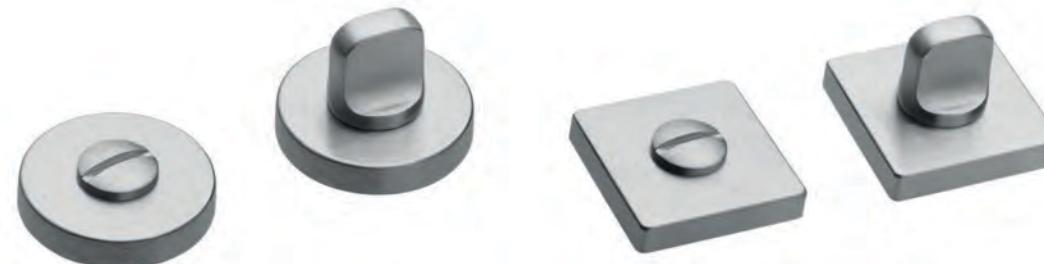

# Loquets d'intimité

## Privacy locks

ART. TZ40/BES

ART. TZ40/QES

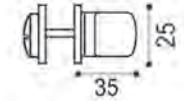

# Minimal

ART. TZ40/BES MINIMAL

ART. TZ40/QES MINIMAL

Le loquet d'intimité est un mécanisme de verrouillage simple qui peut assurer l'intimité lorsque nous sommes dans une pièce. Il peut être verrouillé par une pièce tournante depuis l'intérieur, sans fonction de clé. On l'utilise souvent dans les salles de bains, les chambres ou les bureaux.

The privacy lock is a simple lock mechanism that can provide privacy when we are within a room. It can be locked by a turn piece from the inside of the room, with no key function. It is most commonly used on in bathrooms, bedrooms or offices.
